V14.1 preliminary: seed 42, IID

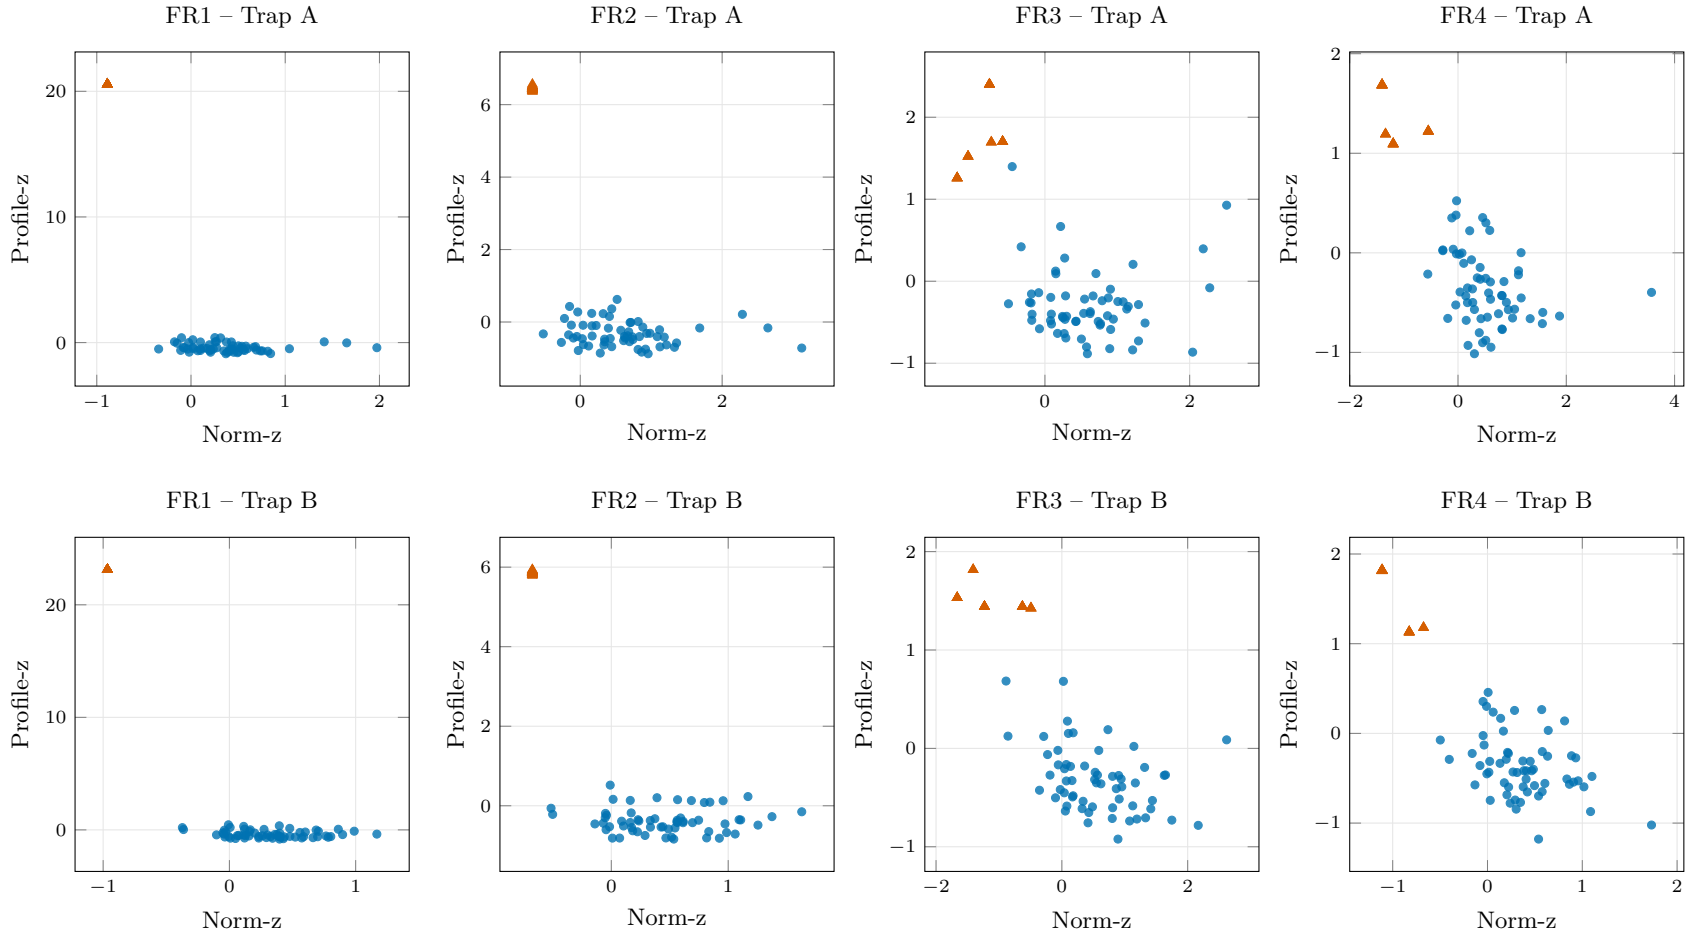

MNIST, 100 clients, 40% free riders; comparison at round 20. Each point is one client response. Blue circles: honest; orange triangles: free riders.
No score sorting, jitter, fitted boundaries, or removals. Axes scale independently per panel.

Top row: Trap A. Bottom row: Trap B. FR1's 40 exact-zero responses coincide at one location; no jitter is added.
Labels are evaluation ground truth, not inputs to the reference statistics. Coincident markers may hide multiple clients.

V14.1 preliminary: seed 42, Non-IID

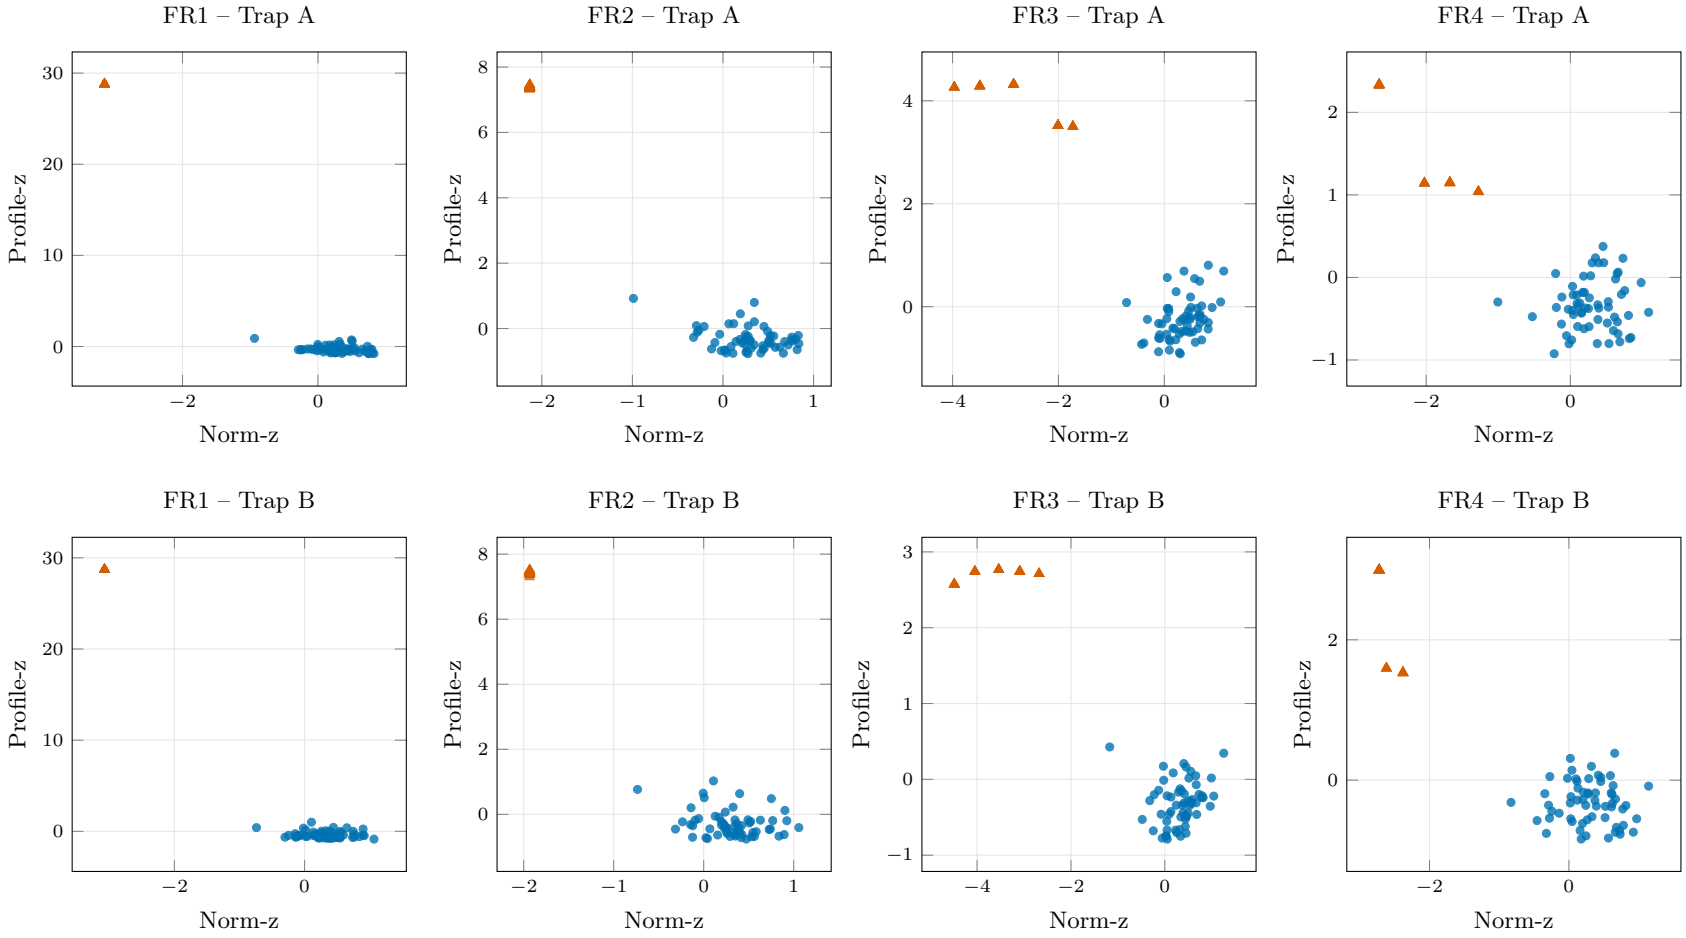

MNIST, 100 clients, 40% free riders; comparison at round 20. Each point is one client response. Blue circles: honest; orange triangles: free riders.
No score sorting, jitter, fitted boundaries, or removals. Axes scale independently per panel.

Top row: Trap A. Bottom row: Trap B. FR1's 40 exact-zero responses coincide at one location; no jitter is added.
