Device 1: local training
Compute
Private data + training resources
Trains the received model
Device 2: local training
Compute
Private data + training resources
Trains the received model
Federated server
Distribute the shared model
Aggregate returned updates
Device 3: local training
Compute
Private data + training resources
Trains the received model
Shared model
Trained update
Perturbed update
Device 4: free rider
Compute
No data or training resources
Fabricates a perturbed update
